CS 205 - Warm-up Project
Data Description Deliverable
Team 10
Paige Melcher, Jack McGowan, Harrison Thompson

Language of Choice:
Python

Description of the Dataset(s): Our first dataset represents a list of countries and their integer populations in 2020, along with the urban population percentage and world population percentage of that country. The second dataset is a list of countries and their gross domestic product in 2020 (measured in USD), along with its percent of contribution to the global GDP. They will be connected by country.

Datasets:

Dataframe Name	Variables			
gdp2020	Country**	Population	Urban Pop %	World Share %
pop2020	Country**	GDP	Global GDP %	

**Indicates the foreign key connecting the two data frames

Both of the data files are attached to the submission
